

DHANUSHKA SACHINTHA

COMPUTER SCIENCE UNDERGRADUATE • SOFTWARE & SYSTEMS ENGINEERING

CAREER OBJECTIVE

Results-driven Computer Science undergraduate with hands-on experience across mobile app development, cloud/Firebase backends, and infrastructure automation. Comfortable working across the stack — from Flutter and Kotlin front ends to Firebase and AWS-based backend provisioning — with a track record of shipping working prototypes in fast-paced, Agile team settings. Looking to bring this versatility to a software engineering, systems engineering, or QA-focused role.

KEY PROJECTS

FixIt / Fixigo *On-Demand Service-Booking App — Flutter & Firebase*

- Engineered a fully functional, high-availability service-booking mobile prototype using Flutter and a real-time Firebase architecture.
- Designed custom dashboard flows and backend event-flows mapping direct client interactions to repair-provider allocations.
- Implemented persistent session management and secure authentication gateways to safeguard client-provider data.

Aura / Elemental ASMR *Cloud-Connected Audio Apps — Flutter & Kotlin*

- Built cloud-connected sound applications with dynamic asset-loading pipelines and secure auth gateways.
- Designed local asset-caching mechanisms that reduced server requests and improved client-side performance.

ResQ *Offline-First Disaster Response Sync App — Hackathon Prototype*

- Partnered within a development squad to design an offline-first disaster-response engine mapping structural field updates.
- Handled data synchronization and conflict resolution logic for re-establishing connectivity after outages.

EDUCATION

BSc (Hons) Computer Science *University of Staffordshire — APIIT Sri Lanka*

- Current Status: Level 5 (Second-Year Undergraduate).
- Key modules: Enterprise Cloud & Infrastructure Automation (83), Mobile App Development (77), Databases & Data Structures (76), Commercial Computing (73).

GCE Advanced Level

- Physics: A | Chemistry: A | Biology: B

ACHIEVEMENTS & INVOLVEMENT

- Top 15 Finalist Team — Hult Prize Nationals
- 3rd Place Winners — Codeverse '25 Hackathon
- Active Member — APIIT Computer Society

PROFILE

BSc (Hons) Computer Science

University of Staffordshire (APIIT Sri Lanka)
Level 5 — 3rd-Year Undergraduate

CORE SKILLS

Languages: Dart, Kotlin, Java, Python, C#, JavaScript, SQL

Mobile: Flutter SDK, Android SDK (Native/Kotlin)

Cloud & Backend: Firebase (Firestore, Realtime DB, Auth), AWS Infrastructure Provisioning, Cloud Automation

Data: Relational Databases, Data Structures & Algorithms, Data Normalization

Practices: Git/GitHub, OOP, Agile Sprints, Automation Pipelines

ACADEMIC RECORD

Enterprise Cloud & Infra Automation — 83
Mobile App Development — 77
Databases & Data Structures — 76
Commercial Computing — 73
GCE A/L: Physics A · Chemistry A · Biology B

LANGUAGES

English — Professional Working Proficiency
Sinhala — Native / Bilingual Proficiency
